## On-Prem Performance for SaaS Services

### Reliable & Secure SaaS Access

SaaS has become a critical business enabler. To help address the security and connectivity challenges of SaaS, Massive Networks' SaaS connect provides operators direct access to leading SaaS services on private circuits as a component of One Pipe Multi-Connect®.

SaaS Connect delivers private, direct connection to major SaaS providers like Salesforce, Workday, and ServiceNow. This eliminates reliance on encrypted links over the

public internet, enhancing security, app performance, and user experience. With over 60 million fiber-lit locations in 58 countries, connecting your team directly to SaaS platforms is easier than you think.

## Robust Security

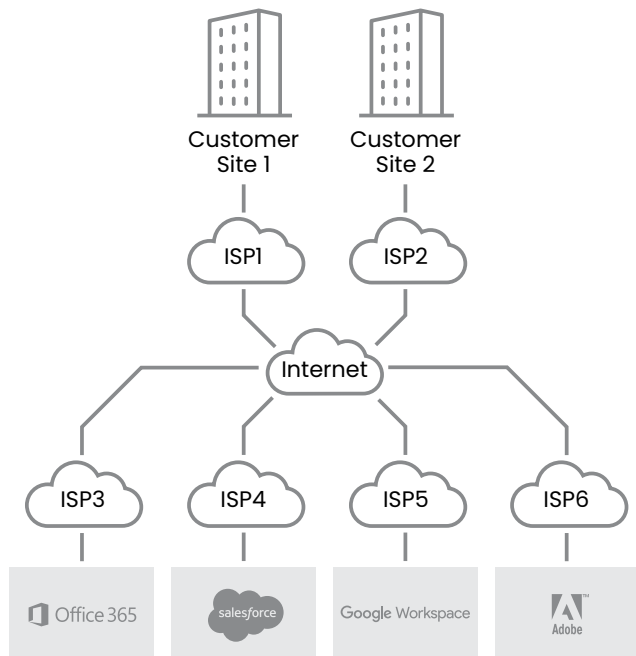

SaaS Connect reduces your attack surface by providing a dedicated connection, reducing the vulnerabilities inherent with internet-based application delivery. It ensures sensitive information, such as financial data in Workday or personally identifiable information in Salesforce, remain secure and segmented from the public internet.

## Enhanced Performance

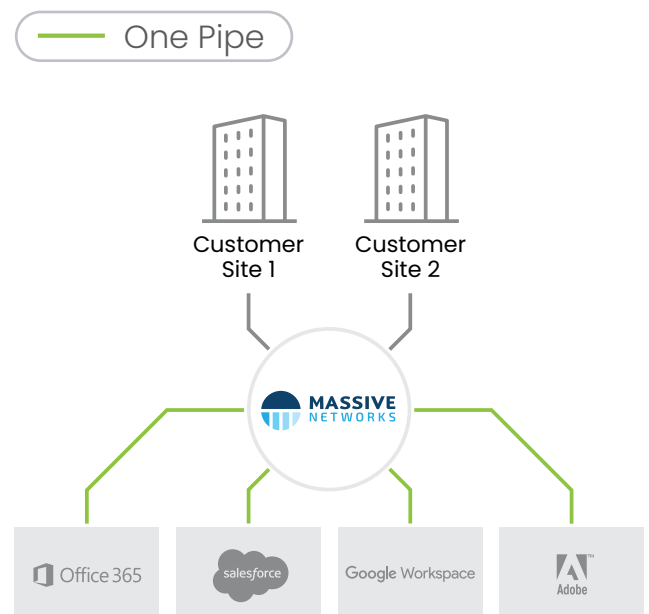

Using direct SaaS connections reduces latency and avoids public internet congestion. This is crucial for business-critical SaaS applications. This also reduces reliance on encrypted internet traffic providing enhanced visibility and observability to network operators.

## One Pipe Multi-Connect®: SaaS Connect

Improved Quality of Service with Direct Connections

Legacy ISP Service

One Pipe SaaS Connect

Increase SaaS performance and reliability with One Pipe

## High-Capacity Connectivity

One Pipe goes beyond simple direct connections. It offers up to 400 Gig bandwidth, supporting diverse needs such as Premium Blended Internet, direct Cloud Connect, and Office-to-Office Connect®. Each requirement is delivered as a Private Layer 2 segment on your One Pipe

Multi-Connect® fiber loop. One Pipe is designed to scale and adapt with your organization, eliminating traditional carrier limitations.
